(54) METHOD, DEVICE, AND SYSTEM FOR MESSAGE MANAGEMENT, AND OPTION MANAGING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To hold consistency among various documentation components by generating a message catalog file used to localize a message text.

SOLUTION: The output of a master message file 10 is constituted by using one set of tools, which are implemented as codes stored on various computer usable storage media of a computer system. Respective output files are generated by the respective tools when a compiler for generating the latest version of a file generated from a master message file 10 is integrated and built. Namely, a PREPERR tool operates the master message file 10 in a 1st process step to generate a header (.h) file 12, an on-line help source (.htg) file 16, and a source (.msg) file 14 used to generate a message catalog.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the  
examiner's decision of rejection or application converted  
registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of  
rejection][Date of requesting appeal against examiner's decision of  
rejection]

[Date of extinction of right]
